

SOLFLASH 30A 12-24V HF

Ref. 10355

Fully automatic battery charger with stabilized power supply. Cables and Clamps included.

Power supply and charger for car and truck batteries. Ideal for use in the automotive and industrial field, SOLFLASH 30A 12-24V HF is a battery charger with high frequency inverter technology, it also works as a backup energy provider (Power Supply). Ideal for continuously supplying power to keep car headlights on at car dealerships (Showroom functionality). ADDITIONAL CHARACTERISTICS: LCD touch screen to change the voltage, the type of battery, select the charging amps, display the charging current, the Ah charged and the state of charge of the battery. Automatic battery charger for 12V and 24V electrolyte acid (Wet), gel, AGM, LFP and Lithium batteries. Stabilized and safe charging of batteries connected to electronic devices. Automatic charging, when the charger reaches 100% of the charge, it automatically enters the end of charge (floating) mode and keeps the battery fully charged even for long periods of time. Charge selection: from 3 to 30A in DC. Stabilized power supply function, (up to 30A) Usable battery capacity: from 30 to 400Ah. Overload protection. Protection fuses against polarity inversion.

SOLFLASH 30A 12-24V HF

Ref. 10355

TECHNICAL DATA

OPTIONAL ACCESSORIES

Technical

Voltaje de carga	12/24V
Corriente de carga Arith.	3 - 30A
Tipo batería	Todos los tipo de baterías de 12 y 24V.
Capacidad de carga max.	30-400Ah
Fuente alimentación	30A

Structural

Protection index	IP31
Weight	3,5kg
Dimensions	320x140x80mm

Electrical

Supply Voltage	220-240VAC 50/60Hz
