

NOZZLE SX-501 2Un

Ref. 05886

❓ The **SX-501 Nozzle** from Solter is a high-performance component for MIG/MAG welding, specially designed for demanding applications where maximum arc and weld pool protection is essential. Offered in a blister pack of 2 units, its robust design ensures stable gas coverage, reducing oxidation and improving weld quality. Ideal for industrial jobs, its thermal resistance and compatibility with SX-501 torches make this nozzle a reliable choice. Ready to weld with total confidence? Get the SX-501 Nozzle today!

Main Features:

- ❓ Blister pack of 2 units: Ideal for professionals who need quick and reliable replacements in demanding environments.
- ❓ Heavy-duty design: Built for industrial environments where continuity and precision in the MIG process are essential.
- ❓ Precise gas coverage: Ensures a uniform flow that protects molten metal from oxygen or nitrogen contamination.
- ❓ High thermal and mechanical resistance: Withstands extreme heat and spatter conditions while maintaining its shape and functionality.
- ❓ Full compatibility with SX-501 torches: Ensures a secure, leak-free fit that keeps equipment performance at its peak.
- ❓ Solter combines expertise, precision, and durability in each of its consumables. The SX-501 Nozzle is the ideal ally for industrial welders who never compromise on quality.
