

BLISTER ELEC. INOX 2mm 10 uds.

Ref.05964

❓ The Solter Stainless Steel Electrode Ø2 mm | 10 pcs is designed for MMA welding of E316L stainless steels. Its specialized coating ensures a stable arc and corrosion-resistant joint. Packaged in a blister pack, it guarantees optimal protection and storage. Manufactured under the most demanding standards, it is ideal for work in the food, chemical, and naval industries. Need safe and long-lasting stainless welds? Do it with Solter!

Key Features:

- ❓ MMA Welding with E316L: This electrode is developed for manual arc welding of stainless steels, especially 316L, maintaining high chemical and mechanical resistance.
- ❓ 2 mm Diameter – Blister pack of 10 units: The compact format ensures protected and safe storage, ideal for maintenance, construction, or fieldwork.
- ❓ Certified professional quality: Complies with the industry's most demanding safety standards, ensuring a reliable and risk-free process.
- ❓ Stable arc and clean weld bead: The high-quality coating allows smooth ignition and a shiny finish, reducing spatter and rework.
- ❓ Long-lasting accessory: Designed by Solter to deliver maximum durability, even in demanding industrial conditions.
- ❓ At Solter, we don't just manufacture consumables—we design long-lasting solutions tailored for the everyday needs of professional welders. Trust our blister packs to always have the best electrode at hand.
