

# BLISTER ELEC. RUTILE 4mm 12 uds.

Ref. 05968

¿The BLISTER ELEC. RUTILE 4mm from Solter includes 12 E6013 electrodes designed for demanding carbon steel welding tasks. Its 4 mm diameter enables high thermal input, making it ideal for structural joints, boiler work, and heavy machinery repair. It ensures easy ignition, a stable arc, and fast slag removal. Suitable for all positions and compatible with both AC and DC. Looking for maximum penetration and strength? Choose professional power with Solter.

## Main Features:

- ¿ High-performance 4 mm E6013 electrodes: Designed to deliver greater material input, they enable thick, deep, and strong weld beads on thick sheets and metal structures.
- ¿ Blister with 12 units: Designed for professionals tackling high-demand jobs who need a precise, portable, and efficient solution.
- ¿ Reliable ignition and stable arc: Thanks to its rutile coating, it ensures quick ignition, continuous welding, and stability under intense working conditions.
- ¿ Self-releasing slag: Simplifies post-welding work, improves the visual finish of the weld bead, and reduces rework time.
- ¿ Suitable for all positions: Excellent control even in vertical-up or overhead welding, with great manageability despite the thickness.
- ¿ Compatible with alternating and direct current: Its versatility allows work with various machines and setups, in either straight or reverse polarity.
- ¿ Professional applications: Especially recommended for boiler work, heavy metal structures, industrial repair, agricultural machinery, or metal construction.
- ¿ At Solter, we know that critical joints require top-tier consumables. The 4 mm E6013 electrode is our answer for those who work with demand, precision, and professional commitment.
