

CONJ. 3m Cu16mm 10-25 ELE.200A

Ref.06124

❓ The Solter Electrode Holder Set is the ideal solution for MMA welding tasks. This kit includes a **16 mm² copper cable with a 3-meter length**, a **male DINSE 10/25 air connector**, and a **durable 200A electrode holder**, ensuring safe and reliable performance in every use. Designed for maximum conductivity and durability, it is perfect for both professional welders and welding enthusiasts. It complies with **EN 60974-11** (for the electrode holder) and **EN 60974-12** (for the connector) standards, guaranteeing quality and safety. Get Solter quality to enhance your welding projects!

Main Features:

- ❓ **High Current Capacity:** Electrode holder with a capacity of up to **200A**, ideal for high-performance MMA welding.
- ❓ **High-Quality Copper Cable:** **16 mm²** conductor ensuring excellent conductivity and heat resistance.
- ❓ **DINSE 10/25 Connector:** Compatible with multiple welding machines for a secure and versatile connection.
- ❓ **Optimal 3-Meter Length:** Provides flexibility and comfort when working in various positions without restrictions.
- ❓ **High-Strength Electrode Holder:** Ergonomic and durable, designed to firmly grip the electrode, providing arc stability and precision in every weld.
- ❓ **Regulatory Compliance:** Certified under **EN 60974-11** for electrode holders and **EN 60974-12** for connectors, ensuring maximum safety and quality.
- ❓ **Durability and Strength:** Made from high-quality materials to ensure a long lifespan in demanding environments.
- ❓ **Professional and Home Use:** Perfect for both experienced welders and those seeking a reliable solution for their projects.
- ❓ Solter guarantees welding accessories designed to deliver performance, safety, and reliability in every application.
