

# EARTH CLAMP LATON 400A

Ref.06129

❓ The **400A Brass Ground Clamp** from Solter is the perfect solution to ensure a stable and secure electrical connection for your welding projects. Designed with high-quality materials, its brass body provides excellent electrical conductivity and corrosion resistance. Its **400A capacity guarantees optimal performance** even under high-demand conditions. Easy to install with a firm grip, it is ideal for industrial and professional applications. Ensure the quality of your connection with Solter's guarantee!

## Main Features:

- ❓ **High Electrical Conductivity:** Made of high-purity brass to ensure excellent current conduction for consistent performance.
- ❓ **400A Capacity:** Designed to withstand high currents, ideal for demanding welding tasks.
- ❓ **Corrosion Resistance:** Brass offers superior durability, even in demanding industrial environments.
- ❓ **Secure Grip:** Robust clamping system that ensures a firm and stable connection at all times.
- ❓ **Easy Installation:** Ergonomic design that simplifies assembly and handling without the need for complex tools.
- ❓ **Versatile Use:** Compatible with various welding equipment, adapting to different professional applications.
- ❓ Trust Solter for welding products that combine safety, efficiency, and durability in every connection.
