

DIFUSER GAS SR-SR-17/26/18 D2 (2u)

Ref. 06245

❓ The SR-17/26/18 D2 Gas Diffuser from Solter is designed to provide uniform shielding gas coverage in TIG welding processes that demand precision and stability. Its 2 mm diameter allows for optimized gas flow, ideal for larger-section electrodes and demanding industrial applications. Compatible with SR-17, SR-26, and SR-18 torches, this diffuser ensures electrode centering and a controlled arc. Sold in a pack of 2 units. Want to improve your welds with every pass? Choose quality and precision with Solter!

Main Features:

- ❓ **Optimized gas flow (D2 mm)**: Suitable for setups requiring higher gas flow, effectively protecting the weld pool.
- ❓ **Technical compatibility**: Designed for SR-17, SR-26, and SR-18 torches, ensuring quick installation with no play.
- ❓ **Greater arc stability**: The diffuser's design keeps the tungsten electrode centered, promoting consistent and high-quality weld beads.
- ❓ **Durable material**: Made from high-strength metallic materials resistant to heat and corrosion, ensuring long-lasting durability and consistent performance.
- ❓ **Cleaner welds**: By minimizing turbulence and maintaining a stable gas curtain, it prevents impurities, oxidation, and common welding defects.
- ❓ At Solter, we know that the difference between a good weld and an excellent one lies in the details. This gas diffuser is a key component for achieving flawless results, even in demanding environments.
