

DIFUSER GAS LENS SR-17/26/18 D2,4 (2u) SOLTER

Ref. 06710

❓ The Gas Lens Diffuser SR-17/26/18 2.4 mm offers superior gas coverage for cleaner and more controlled TIG welds. Designed for SR-17, SR-26, and SR-18 torches, this professional accessory improves argon flow through an internal metal mesh that smooths gas output. Ideal for use with 2.4 mm tungsten electrodes, it ensures a stable arc even under challenging conditions. Comes in a convenient 2-unit blister pack. Add precision and confidence to your TIG welding with Solter!

Main Features:

- ❓ Full compatibility: Suitable for TIG torches SR-17, SR-26, and SR-18, widely used in professional and industrial maintenance environments.
- ❓ 2.4 mm diameter: Compatible with standard electrodes for more demanding welding tasks, offering excellent arc stability.
- ❓ Optimized gas flow: Lens technology with diffuser mesh delivers a laminar, homogeneous, and smooth flow, eliminating turbulence that could contaminate the weld pool.
- ❓ Cleaner welds: Allows electrode extension without sacrificing gas shielding, making it ideal for complex geometries and hard-to-reach areas.
- ❓ Better finish: Promotes the formation of wide, aesthetically flawless weld beads with excellent mechanical strength—essential for stainless steel, aluminum, and titanium.
- ❓ Gas consumption efficiency: Reduces argon usage by up to 40%, representing significant savings in repetitive or long-duration processes.
- ❓ 2-unit pack: Efficient packaging that ensures immediate availability for frequent users.
- ❓ Solter designs every component with reliability and performance in mind. This 2.4 mm gas lens diffuser is the right choice for consistent results in every TIG weld.
