

# SET CLAMP BATTERY 200A

Ref.06017

❓ The **200A BATTERY CLAMP SET** from Solter is the reliable and durable solution for quick and secure 12V battery connections. Made with high-conductivity materials and ergonomic insulation, these clamps ensure efficient current transmission up to 200 amps—ideal for automotive starting and maintenance tasks. An essential accessory for workshops, vehicles, and portable equipment. Robust, practical, and long-lasting: optimize your daily work with Solter's quality guarantee.

Get it now and boost your efficiency in battery starting!

## Main Features:

- ❓ **200A Capacity:** Quickly and safely connects batteries up to 200 amps, ensuring excellent current transfer without losses or overheating.
- ❓ **Robust construction:** Made with a high-strength brass body and ergonomic handles coated with insulating PVC, ideal for intensive and long-term use.
- ❓ **Standard compatibility:** Suitable for battery cables with sections up to Ø12 mm, offering versatility for both professional and personal applications.
- ❓ **Two-color clamps:** Color-coded design (red and black) for quick polarity identification, minimizing connection errors.
- ❓ **Easy handling:** Its compact size and even pressure ensure reliable contact even under demanding working conditions or low temperatures.
- ❓ **At Solter, we are committed to the safety and performance of every accessory.** This set is part of our range of auxiliary solutions designed to support the daily work of professionals in the automotive and welding sectors.
