

ROLL BLANKED FIRE RETARDANT 600°C 1X50M

Ref. 10084

❓ The Solter 600°C Fireproof Blanket Roll 1x50M is the ultimate solution for protection during **welding and cutting in a vertical position**. Made from **fiberglass coated with polyurethane**, this blanket offers thermal resistance of up to **600°C in vertical use**, ensuring **safety against sparks and molten metal splashes**.

Thanks to its roll design, it allows you to **customize the coverage size**, optimizing costs and ensuring uniform protection without vulnerable areas. It is ideal for use in **welding workshops, metallurgical industries, and demanding professional applications**.

Certified under the **UNE EN 13501-1:2007+A1:2010** standard and complying with **EN ISO 11611** and **ISO 15025** safety regulations, this blanket provides **reliable protection in high-risk industrial environments**.

Main Features:

- ❓ **Optimal dimensions and full coverage:** With a size of **1 meter wide x 50 meters long**, this roll provides **comprehensive protection for welding and grinding tasks**, eliminating the need to join multiple small blankets and ensuring no exposed areas.
- ❓ **Thermal resistance of up to 600°C in vertical use:** Designed to withstand extreme temperatures, its **fiberglass coated with polyurethane** composition provides an effective barrier against **sparks, molten metal splashes, and radiant heat**, ensuring workplace safety.
- ❓ **High density and industrial durability:** With a weight of **680 g/m² ± 5%**, this blanket offers an ideal combination of **flexibility and mechanical resistance**, ensuring a **long lifespan even in intensive applications**.
- ❓ **Certified under international safety standards:** Meets the highest standards, including **UNE EN 13501-1, EN ISO 15025, EN ISO 11611, and ISO 9151**, ensuring **fire protection, tensile strength, and safety in welding operations**.
- ❓ **Thermal insulation and protection against liquids and fire:** Its specialized fabric offers **resistance to water and heat**, safeguarding sensitive structures and preventing heat spread on nearby surfaces.
- ❓ **Greater efficiency and long-term savings:** Purchasing in roll format allows you to **optimize costs by up to 30% compared to individual blankets**, while also reducing the need for frequent replacement, enhancing profitability in industrial environments.
- ❓ **Trust Solter for high-performance fireproof protection.** Safety, durability, and maximum efficiency in every meter of coverage.
