

KIT PANNEL GREEN

Ref. K0227

🔗 The **KIT PANER GREEN K0227** from Solter combines visual and structural protection for demanding welding areas. Composed of a green PVC panel (1800x1800 mm) and a metal frame (1900x1900 mm), this kit effectively isolates the welder from other stations, reducing risks and improving visibility in the workspace. Resistant to splashes and combustion, it is ideal for workshops, training centers, and industrial environments. Its assembly is quick, safe, and compatible with other modular solutions from Solter. Ready to enhance safety in your work area? Get the KIT PANER GREEN now!

Key Features:

- 🔗 **1800x1800 mm green PVC panel:** with a thickness of 0.4 mm, it filters UV and IR radiation, protects against incandescent projections, and enhances visibility in the work environment.
- 🔗 **1900x1900 mm metal frame:** robust yet lightweight, designed to provide firm and stable support for the protective panel. Its finish allows for quick and secure assembly.
- 🔗 **Compatibility and modularity:** the panel fits perfectly with the SOLTER 1900 frame, allowing you to configure different protective spaces according to the workshop's needs.
- 🔗 **Versatile applications:** ideal for welding professionals, technical education centers, or industries that require visual and physical separation of work areas.
- 🔗 At Solter, we design each product with safety, durability, and workplace functionality in mind. This kit is the practical and effective solution for those looking to optimize their space with professional-grade materials.
