

KIT SOLMIG 170i MMA / FLUX

- Multiprocess (MIG/MAG - MMA -TIG).
- Wire welding with and without gas up to 0.8mm.
 - 230V-1ph.
 - Supports D200 (5kg).
- Includes earth clamp, MIG torch MMA set & 1 Flux Wire coil.

The SOLMIG-170 wire machine is a multiprocess equipment (MIG/MAG and Electrode) with Inverter technology, ideal for light work, designed to be easy and intuitive to use.

Their single-phase connection, as well as the possibility of using wire without external gas thanks to polarity inversion, give them enormous flexibility.

Both wire speed/power and arc height can be adjusted, which makes it possible to weld all kinds of thicknesses with very good results.

TECHNICAL FEATURES

Generales

Duty Cycle at 40°C	35%
Regulation	20-150A
Intensity MAX.	130A
Intensity at 60%(100%) a 40°C	90A (77A)

Técnicos

Usable electrodes MMA	1,6mm - 3,25mm
Usable wire coil	D200 - 5kg
Wire feeder rolls	2R
Usable welding wire	0,6 - 0,8 mm

Estructurales

Ventilation	FORCED
Weight	7.7Kg
Regulation board	SOLMIG DIGITAL
Standards	EN-90971-1, EN90974-10
Protection index	IP21S
Dimensions	367x153x290mm

Eléctricas

OCV	58V
Absorved power max.	4Kva
Fuse	16A
Connection	230V-1ph

OPTIONAL ACCESSORIES

ANTORCHA 4M TIG SR17V
D10/25
Ref. 06024

REGULADOR R25 AR/CO2
Ref. 56246
