

AEROPROCESS DV Wi

Ref.

Equipo multiproceso compacto de soldadura MIG con devanador separado y una potente regulación sinérgica que permite, en todo momento, un excelente control del arco de soldadura.

Es compatible con **todos** los procesos de soldadura (MIG/MAG, TIG y MMA) y con una amplia variedad de materiales (acero, inoxidable, aluminio, CuSi3, etc.).

Main features:

- Multiprocess welding machine capable of welding using MIG-MAG, TIG Lift-Arc and MMA processes.
- Synergistic control of the welding process with preselection of the work to be done.
- Arc height control to achieve spatter-free welding
- Adjustable Crater-Filling, for a perfect weld bead finish.
- Possibility of adjustment by wire speed (m/min.) and by current (Amp)
- Real-time reading of voltage (Volt) and Intensity (Amp) during welding. When finished, the device displays the average of both parameters.
- Possibility of storing up to 20 programs
- Excellent results with pre-loaded programs in welding: Carbon Steel (SG3), Stainless (Ss-309, Ss-316), Aluminum (AL-5356, AL-4043), Copper-Silicon (CuSi3), Flux cored (Fc-Rutile, Fc-Basic, Fc-316) and Gasless Tubular (E71T-GS)
