

NOZZLE SX-15 2u

Ref. 05936

🔍 The **SX-15 Nozzle** by Solter ensures consistent and effective protection of the weld pool in MIG/MAG processes. Its precise design guarantees a homogeneous gas flow, preventing contamination from oxygen or nitrogen and enhancing weld bead quality. Made from heat- and spatter-resistant materials, it is perfect for continuous, demanding work. Compatible with Solter SX-15 torches, it's the ideal choice for professionals seeking performance and durability in every weld. Want to improve your results from the very first bead? Add this nozzle to your setup now!

Principales Características:

- 🔍 **Optimized shielding gas design:** Its dimensions (18.5 x 53.0 x 12.15 mm) allow for complete and stable coverage of the welding area, protecting the electrode and weld pool.
- 🔍 **High thermal and spatter resistance:** Made with durable materials, it extends equipment lifespan and reduces maintenance in demanding environments.
- 🔍 **Guaranteed compatibility:** Exclusively designed for Solter SX-15 torches, it ensures a secure fit, gas-tight seal, and consistent performance.
- 🔍 **Prevention of welding defects:** Its precise coverage prevents oxidation of the molten metal, ensuring clean finishes with no porosity or inclusions.
- 🔍 At Solter, every accessory is designed to maximize the efficiency of your welding processes, combining professional quality with real solutions to workshop challenges.
