

NOZZLE SX-25 2Un

Ref. 05937

❓ The **SX-25 Nozzle** from Solter delivers uniform and precise shielding gas coverage in MIG/MAG welding, preventing contamination that can compromise weld quality. Made from heat- and spatter-resistant materials, this nozzle ensures consistent performance even in demanding environments. Its full compatibility with SX-25 torches guarantees a perfect fit and a more efficient welding experience. Want cleaner and more durable welds? Add the SX-25 Nozzle to your setup now!

Main Features:

- ❓ **Optimized dimensions:** 21.5 x 57.5 x 15.0 mm ensure a constant and homogeneous shielding gas flow in every weld.
- ❓ **High spatter resistance:** Effectively protects the torch head and electrode, reducing wear and simplifying maintenance.
- ❓ **Guaranteed compatibility:** Specifically designed for Solter SX-25 torches, with a perfect fit for uninterrupted performance.
- ❓ **Improves weld quality:** Prevents oxidation of the molten metal through precise gas coverage, essential for strong and clean joints.
- ❓ **At Solter, we design every consumable with the daily needs of welding professionals in mind, combining technical precision and reliability in every component.**
