

BLISTER ELEC. BASIC 2,5mm 10 uds.

Ref. 05973

❓The Solter E7018 basic electrode blister pack (2.5 mm) delivers top quality for MMA/SMAW manual welding. Its low-hydrogen coating enhances weld strength and minimizes the risk of porosity. Ideal for metal structures, these electrodes work with both AC and DC current and reach 70,000 PSI tensile strength. Each blister pack includes 10 units protected against moisture. Looking for durable, professional welds? Bring Solter efficiency to your projects today!

Key Features:

- ❓Reliable MMA/SMAW welding: Specifically designed for manual welding with coated electrodes, these E7018 electrodes deliver superior performance in critical and demanding joints.
- ❓Compatible with AC and DC: Thanks to their current flexibility, they can be used with most conventional welding machines, optimizing work time in the field or workshop.
- ❓Recommended amperage range of 70 to 90 A: Enables precise welding with a stable arc and excellent penetration, ideal for medium thicknesses.
- ❓Low-hydrogen coating: Minimizes porosity and weld defects, ensuring clean, strong, and high-quality results.
- ❓High mechanical strength: With a tensile strength of 70,000 PSI, these electrodes are ideal for structures subjected to high stress.
- ❓Powerful arc: Reaches temperatures above 3500 °C, enabling efficient fusion of different metals.
- ❓Practical packaging: Blister pack of 10 units designed for optimal preservation, protecting the electrodes from moisture and making transport easy.
- ❓At Solter, we know that precision matters. That's why we develop high-performance consumables to ensure professional results in every weld. Trust our expertise and take the next step in quality.
