

MAGNET D

Ref. 06742

The MAGNET D magnetic square from

Solter combines functionality and precision in a compact tool designed for demanding welders. With a multi-angle design (30°, 45°, 60°, 90°) and a robust metal structure, it securely holds metal pieces in place, optimizing time and results for every joint. Ideal for versatile setups in complex structures.

Get equipped with Solter and work with precision from the very first welding point!

Main Features:

 $\boxed{3}$ 4-in-1 multi-angle design: Allows you to hold metal pieces at the most common angles in structural welding -30° , 45° , 60° , and 90° — without the need to switch tools.

② Effortless precise alignment: Thanks to its permanent magnetization, it securely adheres to ferrous surfaces, freeing the operator's hands and improving workstation ergonomics.

② Professional versatility: Recommended for MIG, TIG, and MMA processes, as well as for assembly, tack welding, or marking tasks in metal structures.

 $\ensuremath{\mathbb{Z}}$ Durable Solter construction: Built with robust materials and quality finishes, this square is designed for long-term use in workshop and industrial environments.

②At Solter, we understand the real needs of welders. The MAGNET D is the ideal choice for those seeking performance, practicality, and adaptability in a single tool.
