

# MAGNET D-SWITCH 75

Ref. 06752

❓The **MAGNET D-SWITCH 75** magnetic square by Solter (Ref. 06752) combines **high clamping force and controlled magnetic activation**, perfect for bulky parts and demanding structures. With its integrated ON/OFF switch, it delivers precision, safety, and speed in repetitive tasks. Work freely at 45° and 90°, and forget about dirty magnets or unnecessary snags. Unleash maximum professional performance with Solter!

## Main Features:

- ❓ **Magnetic ON/OFF switch:** Control when to activate magnetic clamping with a simple twist. Ideal for quick positioning, easy disassembly, and clean maintenance.
- ❓ **Robust format for heavy structures:** With its 152 x 130 x 35 mm dimensions, it provides a solid and secure base for working with large profiles, structural tubes, and thick plates.
- ❓ **Functional angles (45° and 90°):** Supports the most common welding setups with guaranteed stability, preventing shifts that could compromise quality.
- ❓ **Designed for industry:** Recommended for MIG, TIG, or MMA welding processes in metal fabrication, structural assemblies, production lines, or heavy boilerwork.
- ❓ **Solter durable construction:** High-strength steel and reinforced components, designed for intensive use in demanding environments and continuous work shifts.
- ❓ At Solter, we know that time is gold in the workshop. That's why the **MAGNET D-SWITCH 75** puts power, control, and efficiency in your hands to achieve flawless finishes under any condition.

# MAGNET D-SWITCH 75

Ref. 06752

## CARACTERÍSTICAS TÉCNICAS

Generales	
Product Code	06752
Use	Large Metal Structure Clamping

## ACCESORIOS OPCIONALES
