LINER POLYAMIDE 1,2-1,6mm

Ref. 06722

\xa0La **sirga de poliamida Ø 1,2-1,6 mm de 4 metro** \xa0está diseñada para garantizar una alimentación suave y precisa del hilo de aluminio en procesos MIG/MAG. Fabricada en poliamida de baja fricción con refuerzo metálico, permite un guiado eficiente incluso con hilos de mayor grosor. Ideal para soldadores que trabajan con aluminio o aleaciones blandas, mejora la continuidad del cordón y evita atascos. Compatible con antorchas MIG estándar y hilos de Ø 1,2 a 1,6 mm. ¿Listo para optimizar tu proceso de soldadura? ¡Confía en la tecnología Solter!

Main Features:

 Designed for Ø 1.2–1.6 mm aluminum wire: Compatible with thicker wires, this liner ensures stable feeding even under higher demand, making it ideal for industrial applications or tasks with greater requirements.

 High-strength, low-friction polyamide: Its composition allows aluminum wire to feed smoothly without interruptions, reducing the risk of jamming and enhancing MIG/MAG process performance.

 Reinforced metal tip: Enhances heat dissipation in critical areas of the torch and ensures a strong connection in high-load applications.

 Professional 4-meter length: Fits most MIG torches on the market, making replacement easy and ensuring compatibility without additional adjustments.

 Greater control and cleaner weld bead: Ideal for welding aluminum or soft alloys, where maximum continuity and precision are essential.

Solter is committed to technical solutions that enhance the daily work of welding professionals. The liner Ref. 06722 is synonymous with trust, durability, and efficiency in every meter of wire fed.

LINER POLYAMIDE 1,2-1,6mm

Ref. 06722

CARACTERÍSTICAS TÉCNICAS

Generales	
Product Code	06722
Diameter	Ø 1,2-1,6 mm
Use	Aluminum wire guide for MIG torch

Estructurales	
Longitud	4 m
Material	Polyamide with Metal Tip

ACCESORIOS OPCIONALES
