

TIP HOLDER M8 SX-25 2u

Ref. 06763

❓The **M8 SX-25 TUBE HOLDER** from Solter ensures a robust and precise fastening of the contact tip in your SX-25 MIG torch. Made from high-conductivity copper, this component enhances arc stability and optimizes shielding gas flow. Its M8 thread guarantees a perfect fit, ideal for demanding jobs where every detail matters. Supplied in a 2-unit pack, it facilitates preventive maintenance of your equipment. Looking for reliability in every weld? Add the **M8 SX-25 TUBE HOLDER** and boost your performance today!

Key Features:

- ❓ **Solid fastening with M8 thread:** Designed to prevent movement or shifting of the contact tip during MIG welding, even under intensive use conditions.
- ❓ **Shielding gas optimization:** Its structure allows continuous and uniform flow, enhancing bead quality and preventing common welding defects.
- ❓ **Guaranteed durability:** Built from high-purity, high thermal resistance copper, it withstands high temperatures without deforming or losing efficiency.
- ❓ **Guaranteed compatibility with SX-25:** Specifically adapted for SX-25 MIG torches, eliminating the need for adjustments that could compromise performance.
- ❓ **Professional maintenance:** Includes 2 units, ideal for periodic replacements that extend the torch's lifespan and prevent operational failures.
- ❓ **At Solter, we develop our consumables with a professional and rigorous approach,** ensuring maximum performance and safety in your welding processes. With the **M8 SX-25 TUBE HOLDER**, you guarantee precision, durability, and reliability in every project.

TIP HOLDER M8 SX-25 2u
