

COURTAIN 1800 x 1400 GREEN

Ref. 10077

Solter Green Welding Curtain 1800 x 1400 provides certified protection against ultraviolet (UV) and infrared (IR) radiation, creating a safer environment for operators and nearby personnel. Its high-resistance 0.35 mm PVC with green shade 6 filters welding glare and reflections, reducing eye fatigue. Thanks to its self-extinguishing material, it lowers the risk of fires caused by sparks. Complies with UNE-EN ISO 25980:2015 and EN 1598 standards, ensuring safe and reliable use in professional workshops. With dimensions of 1800 x 1400 mm, it easily adapts to standard structures.

Main Features:

- ✓ **Protection against UV and IR radiation** : filters intense light, preventing eye damage and skin burns.
- ✓ **Self-extinguishing material**: minimizes fire risks from hot projections.
- ✓ **Green shade 6** : reduces glare and improves visual comfort during long welding sessions.
- ✓ **Work area delimitation**: creates visible barriers that separate the welding zone from the rest of the workshop.
- ✓ **High-resistance PVC (0.35 mm)**: ensures durability under intensive use.
- ✓ **Easy installation**: dimensions of 1800 x 1400 mm allow quick mounting on standard supports.
- ✓ **UNE-EN ISO 25980:2015 and EN 1598 compliance** : safety validated under international standards.
